Kinesiology Tape

The Premium Worldwide Brand

“excellent”

Ares Kinesiology tape has received the highest rating after dermatological skin test for primary skin irritation and hypersensitivity of human subjects.

1

Introduction of Godlisha Corp.

We Godlisha Corp., started a Kinesiology tape production in 2008. Our top priority is product quality and we believe it is the most important factor that can make our business last long and prosperous. Strict raw material choice and comprehensive production process are all done in Korea for all our products.

We always use all ingredients at top grade level, all procured within domestic market only. Currently we are exporting our goods to over thirty countries globally in a way of our brand, ARES tape and also various OEM customized brand tapes.

We have developed Synthetic (Rayon), roll type of precut tape and cosmetic tape for the first time in Korea. We have various product options such as cotton/rayon, uncut/precut, cosmetic/equine and so on. We are continuously working on developing new product to remain as a market leader in manufacturing of Kinesiology tape.

Key Strengths of Godlisha Corp.

- Ares Kinesiology tape has received the highest rating (“excellent”) after dermatological skin test for primary skin irritation and hypersensitivity of human subjects. Dermatest is an authoritative German research institute and laboratory for allergologic and dermatologic researches providing reliable results.
- Cytotoxicity & sensitization test has completed by KTR. KTR is renowned testing & research institute in Korea.
- We, Godlisha has been nominated as a Promising Small/Medium Enterprise (PSME) in Export by Ministry of SMEs in Korea. We also have years of experience in OEM production. We are an expert in Kinesiology tape production.
- Our facility is certified with ISO9001, ISO13485 and our tape is qualified with CE, KFDA, US FDA, KTR (Renowned Testing & Research Institute in Korea), the highest rating in Dermatest(German Skin Test Institute).

We always use high quality skin-friendly fabric and Latex-free hypoallergenic adhesive.

When it comes to Rayon (Synthetic) fabric, it is much more luminous and strongly water-resistant compared to other competitors.

All the fabric we use does not include DOP (Diocetyl Phthalate) which often causes adhesive malfunction, skin troubles and less duration of adhesive strength. DOP is often detected in Chinese products.

What is ARES Tape?

Ares Kinesiology Tape is an elastic therapeutic and sporting tape for Kinesiology Taping Method, which is worldwide technique being used in many sporting fields as successfully as with patients in a physiotherapeutic setting.

Ares Kinesiology Tape is designed to the same thickness and elasticity of the epidermis (outlayer) of the skin with longitudinal stretch.

Ares Kinesiology Tape is used in treatment of muscle, fascia and tendon symptoms and for performance enhancement by way of continuous receptor stimulation.

Natural healing process is therefore instantly enhanced due to improved circulation in the taped area.

- *Treat sport injuries and general muscle pain*
- *Promote blood / lymph circulation and healing*
- *Support for muscles and joints*
- *Prevent injuries and fatigue*
- *Enhance performance*

<Condition after Taping Method with Ares Tape>

1. ARES tape lifts the skin with convolution effect.
2. Interstitial space gets enlarged.
3. Blood/ lymph circulation is improved.
4. Inflammation reaction is reduced.
5. Muscle activities are enhanced with reduced pain.

4

Physiological Effect

When a muscle is inflamed, swollen, or stiff, the space between the skin and the muscle is compressed, resulting in constriction and congestion to the flow of lymphatic fluid and blood circulation. This compression applies pressure to the pain receptors located in the space between the skin and the muscle, which in turn relays discomfort signals to the brain resulting in the sense of 'pain' of affected area.

If you stretch the skin of the affected area before the application of **Ares Kinesiology Tape** the taped area will form wrinkles when the applied area is back to its normal or neutral position. The wrinkling effect formed by **Ares Kinesiology Tape** is essential since this lifting of the skin creates more space for lymph and blood flow. Therefore the lymph drainage as well as blood circulation in the affected area can be improved effectively through taping application.

Eventually, the friction between the tissues beneath the skin is decreased due to the promoted movement of lymphatic fluid and blood circulation. Pain is reduced because the pressure on the pain receptors is lessened. The end results are believed to be reduced muscle fatigue, increase in range of motion (ROM), and better quality of muscle contraction.
